## Capstone Remote Monitoring System (Maintenance Edition)

---

This document (plus the User Edition), presents the additional capability to monitor, control, and troubleshoot the MicroTurbine via the Capstone Remote Monitoring System (CRMS) software.

### **Chapter 4: OEM Manufacturer**

This version of CRMS can be used to program various Personality Module (PM) devices. A unique registration serial number has been assigned to each OEM.

Based upon specific registration information, CRMS decodes the exclusive Original Equipment Manufacturer (OEM) Number designated to each OEM.

This OEM Number is then used to customize CRMS Maintenance Edition software and to program the Manufacturer Location for each PM Device.

CRMS has special rules for handling OEM PM devices. In this way, CRMS will not be functional (except for the PM Uploading feature), when the MicroTurbine has a Manufacturer Location number other than the exclusive OEM Number, which has been assigned.

## Notes and Related Information
